

OMKAR

Modular Systems LLP

An ISO 9001:2015 Certified Company

About Us

“Omkar” started its business in the early 1987 as a dealer of well know brand SINTEX (Sintex Industries Ltd.). In its initial stages Omkar dealt in Sintex PVC Doors & Profiles. After being in the dealership business for more than 15yrs Omkar finally decided to start its own manufacturing Facility of PVC Modular Furniture and became OMKAR MODULAR SYSTEM LLP in 2017. The idea behind starting our own set up was to provide strong, durable & aesthetical modular furniture which can completely replace the use of wood / plywood and Stainless Steel Furniture. Our product can contribute towards **‘Nature Conservation.’**

The customised modular furniture we offer comes with multiple advantages as compared to conventional wood based materials and most importantly its 1000% ECO friendly. Our PVC board material not only helps in saving the natural forests but also allows us to deliver product much faster to our customers across the country.
